

CAREER WORKS

Launch Your Future

Career Works will help youth discover a passion for their futures through exploring exciting career opportunities.

This summer, teens will be given the opportunity to experience over 20 career pathways in trade skills, automotive, diesel, hospitality, and much more using our TRANSFR VR headsets **every Friday Morning starting at 9 a.m.** Teens will find what interests them in virtual reality, as well as work on portfolios and resumes to track their progress and get a head start in their future careers. Guest speakers will join us to build teens' job-seeking skills.

Community partners, like Moser Energy Systems and Automation & Electronics, will provide hands-on learning experience.

To reserve a spot, contact Teen Director Sherman Hill at shill@bgccw.org or 307-473-5553. All sessions begin at the Main Club, 1701 E. K St.
